DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over DE 19818046.
4. The rejection set forth under 35 USC 102/103 in the paper mailed 4/3/09 is deemed proper and is herein repeated.
5. The newly amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.
6. Applicants arguments are directed to the newly presented claim limitation "one film-former". It is alleged that this limitation renders the claims patentable because the cited art incorporates a film forming polymer in addition to the polyvinylpyrrolidone as claimed. Applicants argue that the addition of a polyamide, as discussed in the art, renders the instantly claimed invention patentable. This is not persuasive.

Art Unit: 1796

7. The claim language "one film-former" is not seen to be the same as --a single polymeric component-- as is being argued by applicant. The language "film-former" is functional language and reads on a component that forms a film. This is to say that a combination of polymeric components falls within the scope of a single "film former." There is nothing in the specification that limits the language "film former" to a single polymeric component. As such, the claims remain anticipated.

8. The claims are further rendered prima facie obvious under 35 USC 103. This rejection is stated in the first office action and is restated here. Specifically, in the event that the claims can be interpreted so as to be limited to a single polymeric component, as argued by applicant, then it is prima facie obvious to leave out a known ingredient and lose its known function. Here, the patent specifically addresses advantages obtained when using a combination of polymers. One of ordinary skill appreciates the advantages obtained when using the combination as taught in the art. Thus, one appreciates the function of each of the polymeric components and leaving one of them out and losing the attendant function is obvious. Applicant has failed to show or allege any unexpected results obtained when a single polymeric component is used.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1796

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
